

CompIQ Services

Comprehensive Medical Bill Review and Cost Containment

ACS CompIQ is the premier national provider of medical bill review software and services to the workers' compensation, group health and liability insurance industry.

Integrated with claim management software and nurse case management systems, this advanced bill review system yields maximum savings through:

- Real-time medical management implementation and audit
- Effective return-to-work program
- Linked cost containment programs
- Treatment tracking and enforcement.

Two Powerful Applications

The CompIQ solution includes two powerful software applications: IQReview® and IQAudit.

IQReview, our proprietary, Web-based software, gives you access to full-featured medical bill review and case management systems, from virtually any location. It provides fast, accurate methods to ensure the maximum reductions allowed by law on all medical bills, including:

- Automatic duplicate bill check
- Hot-key controls
- Superior handling of CPT codes.

IQAudit reviews out-of-network medical billing for all lines of coverage. By doing so, it delivers superior savings on workers' compensation, liability, group health and auto medical claims. It includes:

- A high-tech approach to facility bill auditing and negotiations
- Cost reductions on bills not covered by fee schedules or PPO
- GeoComp line audit services that re-price surgery and large facility bills
- Nurse desktop audits
- Peer reviews.

CompIQ Customized Solutions

- Technology-Driven Medical Bill Review
